

## ATT TERMINAL®

### NEW BARRIER TERMINAL FOR SNOLINE by LINDSAY

Snoline is proud to introduce the new ATT Terminal®, a barrier terminal made in Italy, that meets the market's need of an end terminal that is quick and easy to install, designed to provide maximum levels of security, using quality material while containing costs.

The Snoline's ATT Terminal® technology uses a system of posts, beams and sliders, which can be connected to most barriers present on the market, for other applications, the Snoline's technical department can review and provide customized solutions.

#### Features and Specifications:

- System weight of approx. 350 kg
- Meets the ENV1317-4 criteria
- Applicable for speed of 110 km /ph
- Easy to install a team of 3 people in 1 hour (on average) and does not require foundation work
- A barrier terminal 16 m long

Snoline's new ATT Terminal®  
SAFE and EASY TO INSTALL
